Protest Meeting Passes Resolutions

At a well represented meeting of schools and ratepayers of the Didsbury district held Tuesday night protesting against the creating of enlarged school units, three resolutions were passed as follows:

"Whereas the department of education has determined to bring into effect the enlarged school units for the purpose of administration without allowing the voters of the school districts the right of a referendum, be it resolved that this public meeting desire each school district take a plebiscite vote and that the returns be forwarded to a secretary of a central committee by the secretary of each school district for the purpose advising the government of our wishes.

"Resolved that a Central Committee be elected comprising one member from each of the towns from Olds to Airdrie inclusive.

"Resolved that this meeting be placed on record as being opposed to the establishment of larger school divisions without first taking a plebiscite vote and that the government abide by the decision of the people as shown by this vote."

Mr. James Hargood was elected to represent this district on a central committee.

Mr. W. H. Davies was elected chairman of the meeting at which Mr. W. H. A. Thomas of Olds, as guest speaker, outlined the objections to the proposed plan. Many opinions were voiced in protest with only two supporting the plan. Threatened discords were quickly averted by the prompt rulings of the chairman.

Didsbury Band Entertained, Calgary

Sunday last the Didsbury Band journeyed to Calgary, where they were entertained throughout the day by the Native Boys' Band.

At noon they dined at the homes of the various members of that Calgary band. In the afternoon they played in a band concert at St. George's Island, while later in the afternoon at St. Picnic grounds, a softball game between the two bands ended in a tie. Mr. Hayward and Dr. Liesemer, the two directors, doing the pitching. There was a picnic lunch at 6 o'clock.

In the evening the two bands played for an open-air service on the picnic grounds, the remainder of the evening being spent in viewing the sights of the city. The visitors were billeted at the homes of their hosts the Native Boys' Band.

Monday morning the Didsbury boys received honorable mention over the radio upon their smart appearance in the Stampede Parade. After an enjoyable day spent at the stampede, most of the boys arrived home tired but happy during the early hours of Tuesday morning.

Crystal Dairy in Prizes.

Exhibiting June made butter in packs of 14 pounds, the local Crystal Dairy was successful in taking second prize at Brandon exhibition last week, and with a similar exhibit took a second at Calgary on Monday. Congratulations are due to the local dairy for its consistent prize-winning at major exhibitions, and credit is due also to local dairymen, the results showing the outstanding quality of the cream produced by Didsbury dairy herds.

Mt. View M.D. Council.

J. R. Boon, provincial government field supervisor, was present at the Mountain View M.D. council meeting held at Olds on Saturday, and stressed the need of more control of the weed situation in general, particularly the cutting of weeds on road allowances.

The Weeds Act provides that the farmer must cut and control weeds up to the centre line of all contiguous roads or road allowances adjacent to his land.

The council appointed Mr. Floyd Ahlgrim weed inspector, and his duties will commence immediately.

A communication from the department of public works was read pointing out that it was a responsibility of the municipality to keep in repair all roads, bridges, etc. This now transfers to the municipality the control and maintenance of all works now constructed or which will be constructed by the province within the municipality.

Notices were on hand from the official receiver that eleven farmers had come under the Farmers' Credit Arrangements Act.

It was reported that one case for old age pension had been approved by the department.

Grants of \$50 were voted to both the Olds and Didsbury Agricultural Societies.

Passing of payrolls and accounts occupied the remainder of the meeting.

Mr. Eddie Clemens of the Hudson's Bay staff, Calgary, is vacationing with his parents here.

LOCAL & GENERAL

Four Evans brothers, Elwood, Elmer, Fred and Art are attending summer school at Edmonton.

Mr. and Mrs. S. F. Brown moved some household effects on Tuesday to Sylvan Lake where they are furnishing their new cottage.

Dr. and Mrs. Moore and son Mickey, of Medicine Hat, were the guests of Mr. and Mrs. Dunlop for a few days last week.

A meeting of the directors of the Didsbury Agricultural Society will be held at C. E. Reiber's office on Tuesday, July 13, at 2 p. m.

Mr. and Mrs. J. A. McGhee spent the latter part of last week in the Raven district where they enjoyed some excellent fishing.

Mr. and Mrs. E. J. Dickson and family of Calgary and Mr. W. G. Moffett of Blairmore were Sunday visitors at the home of Mr. and Mrs. J. E. Moffett.

Mrs. Kirk left Sunday for Lethbridge where she will spend a month visiting friends and relatives. Mr. Orvil Kirk has gone to Edmonton to mark examination papers.

We regret to hear that Mr. George Elder is confined to hospital at Innisfail in a very critical condition as a result of heart trouble. The Pioneer joins with many others in wishing Mr. Elder speedy recovery.

Mr. and Mrs. J. E. Moffatt had as their guests for the past two days Mr. and Mrs. Walter Johnson of Peace River. Mrs. Moffatt, in company with Mr. and Mrs. Johnson, was a Calgary visitor on Monday.

Mr. and Mrs. A. S. Gole and children left Didsbury on Tuesday morning for a five weeks motor trip to Breslau, Ontario, the home of Mr. Gole's parents. Jimmie Lamont is in charge of the grist mill while Mr. Gole is away.

Mr. H. W. Chambers left last Saturday for Vancouver and coastal points. He is travelling by bus and plans on making a grand tour via California, Salt Lake City, Yellowstone National Park and home. During his absence Mr. H. Jarvis of Bagshaw is assisting at the store.

Dr. Arnold Liesemer of Chicago and Dr. J. M. Williams of Aurora, Ill., are guests of the former's parents, Mr. and Mrs. W. G. Liesemer. They will attend the Calgary stampede and also spend a few days at Banff prior to their return to the United States.

"Wife Vs. Secretary."

Louis-Braddock Fight Pictures.

Faith Baldwin's deliciously racy Cosmopolitan Magazine triangle romance, "Wife Versus Secretary," is the star attraction at the Opera House this Friday and Saturday.

Here's no story of frowzy wife and snappy secretary. It is a story of two beautiful and attractive women and one man. Get ready for a grand battle of hearts, spiced with laughter and rollicking with fun. The three principal characters are portrayed by Clark Gable, Jean Harlow and Myrna Loy.

An added attraction will be the screening of the Louis-Braddock Fight. This will be the first showing of the big fight pictures outside of the cities.

Will Hold Lawn Social.

The Albright Brotherhood will sponsor a Lawn Social at the home of Mr. and Mrs. Ed Liesemer next Wednesday evening. Ice cream, raspberries and cake will be served, a small charge being made for this. Games will commence at 7 o'clock. Everyone is cordially welcome and transportation will be arranged by seeing either the pastor, Rev. A. S. Caughell or Mr. Pete Jansen.

Knox Sunday School Picnic.

The annual picnic of Knox United Sunday School was held Wednesday afternoon at the grove of Mr. and Mrs. Bruce Parker. There was a good attendance, especially of the younger folk, so that a fine program of races and sports was keenly contested and enjoyed by all. Peanut creams, candy and an abundance of ice cream aided in making the picnic one long to be remembered.

Evangelical Church Notes.

"Principles to be inculcated on Children in a Christian Home" will be the subject next Sunday morning. During the Sunday School hour the annual Children's Day service will be held. In the evening the topic will be "God's Pardoning Power."

Shorthorn Field Day Lacombe July 12th

For anyone who enjoys good livestock, the most interesting field day of this summer at the Dominion Experimental Station, Lacombe, will be Monday, July 12th. This field day is being sponsored by the Alberta Shorthorn Breeders' Association, and the programme will consist of addresses by some of the leading Shorthorn breeders of Canada and the United States. At the Experimental Station, there are many branches of work including poultry, bees, horticulture, forage and cereal crops and the large herd of Yorkshire and Landrace hogs which will interest everyone. For many, the most attractive feature of the program will be the parade of about thirty Shorthorns and thirty-five Clydesdales.

Coffee, cream, sugar and cups will be provided by the Station. Visitors are asked to bring lunch.

Tenders Wanted.

Tenders are called for the Reshingling of the Roof of the Clovermount School, labor only. Shingles to be stained. The work is to be completed by August 15, 1937.

Tenders will be accepted until July 15 by the undersigned

Science And World Peace

In the past few years, and even in the past few months, science has made remarkable contributions in the direction of prolongation of human life in the fields of both surgery and medicine.

In support of the foregoing statement reference only is necessary to the daily newspapers, for very few days pass without the announcement of some new medical discovery of importance to the human race or of some new excursion into the realm of surgical science, in some part of the globe.

Diseases to which human flesh is prone are being conquered one by one and the severity of other diseases which have not yet entirely succumbed to laboratory or other experimental treatment is being mitigated, either in the field of preventive medicine or by new forms of treatment.

As a result of this wide spread experimentation and treatment the span of human life is being gradually but surely lengthened with prospects of further increases in life expectancy as discoveries progress on geometric scale.

In Washington recently Dr. Parran, surgeon-general of the United States announced that in the last 80 years the average length of life of men has increased from 38 to 61 years and that of women from 40 to 61 years.

He predicted that in the next few years the incidence of heart disease, a greater killer than cancer, will be materially reduced as a result of the present drive to control and eradicate syphilis, a contributing cause of heart failure, and said that considerable progress in lengthening the lives of cancer sufferers may be expected in the next few years as a result of campaigns to educate the public to the fact that the disease is curable in its early stages. There are prospects that even the common cold will be banished in the near future.

All this is so much to the good, and in this field science is conferring great benefits upon humanity, but, on the other hand, science is also being utilized as a handmaiden to the god, Mars, for the destruction of the human race on a wholesale scale.

As an agent of destruction of human life science is being harnessed and requisitioned at a tremendous rate. Since the Great War of 1914-18, new engines of warfare have been developed capable of carnage which will make the slaughter in the former war look puny by comparison. New gases have been evolved capable of creating tremendous havoc among civilian populations as well as fighting forces, and the range and power of instruments of destruction have been increased enormously, so much so, that it is sometimes asserted, with possibly a degree of truth, that another major war has been averted to date, only because of the fear of the consequences.

While it is impossible to make a comparison on a mathematical basis of the life-saving and life-destroying possibilities of scientific achievement, it is probably not a far-fetched guess that greater strides have been made in the destructive field in the past decade than in the beneficial one.

One is sometimes tempted to ask: "What is the use of expending money and brains in bending science to the service of mankind to save and prolong life and to promote health and happiness, if the same agency is to be utilized to destroy humanity on a grand scale?"

Nevertheless, the energy and treasure spent on research and experimentation in the medical arena is worth while for the benefits they confer on suffering humanity in better health and life extension; in the hope that governments which are flirting with wholesale murder and rapine will come to their senses, or that the rank and file of their subjects will bring such pressure to bear upon them that they will not dare to push them over the brink of the precipice which appears to gape for them.

With this frightfulness in prospect for the next great international conflagration and with the usefulness of the League of Nations as a practical preventive of war in the discard, at any rate for the time being, people of the world, and more particularly those of the democratic countries, are looking around for some agency or some measures that will ensure peace and prevent a slaughter that might well rock the world to its foundations.

Various suggestions have been made, not the least interesting of which is a proposal for some sort of pact or understanding among the democratic nations as an insurance policy of self-preservation and this may be the practical solution of the problem to-day.

An alliance of the chief Anglo-Saxon democracies—the British Empire and the United States—together with the northern European democracies in the interests of the preservation of world peace would surely act as a powerful curb on those countries which might desire to precipitate conflict or even the most powerful coalition of war-minded nations, if such an alliance can be brought about.

The Bank of England has a \$200,000 kitchen which can serve lunches at the rate of 2,000 a day. It is said to be the largest and most costly staff kitchen in London.

IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!

GIN PILLS
FOR THE KIDNEYS

An Aid to Research
A brief story in the Baltimore Sun recently relates that the Johns Hopkins University is card-indexing the diseases of its patients as an aid to research. In passing it is remarked that "staff physicians have knowledge of 15,000 maladies" and that records of the 2,500 different kind of operations that can be performed also are being listed.

Included in Treaty
A very old and exceptionally large tortoise once lived on the island of Mauritius for so long that it became a national possession, and in 1890, when the French ceded the island to England, the tortoise was specifically mentioned in the treaty.

Most recipes for any type of food or dish call for a pinch of salt. When baking a cake, whether the recipe calls for it or not, a pinch of salt adds flavor that you cannot get in any other way.

Great Believer In Canada

Experimental Station Official Thinks It Best Place To Live

Canada offers more to the individual than any other nation in the world, Superintendent W. R. Reek of the Western Ontario Experimental station told members of the Men's Association of the Erie street United church in Ridgeway, Ontario, at a discussion at which he was the guest speaker.

"As a member of the British commonwealth of nations, the security and satisfaction offered by Canada is not lessened but enhanced and the future of the individual liberty under such is also guaranteed," he said. "Then let us stay here and be loyal to our country, our Empire and our King."

Interesting facts about Canada mentioned by Mr. Reek included information concerning its rivers, the Mackenzie including the Peace is 2,525 miles in length, the St. Lawrence with the lakes 1,900 miles, Nelson, including the south Saskatchewan 1,600 miles and the Churchill 1,000 miles long. Canada's fisheries produce 569 species of fish and exports to the value of \$50,000,000 go annually to 100 different countries; in forest wealth, Canada is third to Russia and Brazil and second in the production of paper, the government controlling nine-tenths of the forest; out of Canada's two and a quarter billion acres of land only 71,000,000 acres are cultivated.

An interesting fact concerning the canal at Sault Ste. Marie was told by Mr. Reek: "In 1929 the canal at Sault Ste. Marie had three times the tonnage of the Panama Canal, and more than the Panama Canal and the Suez put together."

Rare Currency Destroyed

Duplicate U.S. Notes Were Property Of Late Hetty Green

A suitcase full of rare currency was hacked to pieces and burned at the U.S. Treasury. Authorities said it would have been worth \$1,000,000 in the collectors' market.

They disclosed the currency was from a collection started by the late Hetty Green, once rated the world's wealthiest woman.

It was turned over to the Treasury for its face value of \$198,176.

The collection is one of the most valuable in the world, officials said, containing two sets of all notes ever issued by the Federal Government.

Explaining why the Green estate handed over currency worth \$1,000,000 for less than a fifth of that figure, officials said James Wade, of the Chase National Bank, at New York, had advised this be done. They said Wade suggested that, where the collection contained more than two of any type of note, the extras should be redeemed.

The usual Treasury policy is to destroy redeemed currency when it is of a kind no longer being issued. This had the effect of making the remaining Green collection more valuable, it was said, by reducing the number of rare notes outstanding.

SELECTED RECIPES

CARAMEL DELIGHT

1 cup brown sugar
1/2 cup Crown Brand Corn Syrup
1/2 cup boiling water
4 1/2 tablespoons Benson's Corn Starch
1/2 teaspoon salt
1/2 cup cold milk
2 cups scalded milk
1 egg
1/2 teaspoon vanilla
Caramelize the sugar and Crown Brand Corn Syrup; add boiling water and cook until quite thick. Mix Benson's Corn Starch, salt and cold milk to a paste; add to scalded milk in top of double boiler, stirring until thick. Add caramel mixture. Cook 20 minutes, stirring occasionally. Add well-beaten egg and continue cooking 3 minutes; add vanilla. Chill and serve with Crown Brand Corn Syrup, topping with walnuts.

The Punishment

An old Scots woman was wandering round the local museum with her grandson. When they came to the usual statue of Venus de Milo, with half an arm missing on one side and the whole arm cut away on the other. "There ye are, my lad," said the old grandmother, wagging her finger to the youngster. "That's what comes o' biting your finger-nails."

Noted Inventor Died Poor

Received Very Little For Perfecting Process For Engraving

Frederick Eugene Ives, who did more to develop modern newspaper and magazine illustration than any other man, died in Philadelphia at the age of 81 after a long illness.

It was Ives who invented the halftone process of photoengraving which permitted reproduction of photographs and even paintings with great fidelity and artistry.

Before the perfection of the halftone (in which a screen of almost invisible dots is used in reproducing pictures to bring out the gradations of tone), most newspaper illustrations were made from wood cuts and the effect often was crude.

Ives also devised the intaglio plates which preceded the rotogravure supplements. He was a pioneer in color photography and invented the modern form of the binocular microscope.

Ives obtained more than 70 patents on his inventions. But he failed to patent the halftone process because the first firm that employed it hoped to keep the system a secret and instead of becoming a millionaire, the inventor, in his later years, had barely enough on which to live.

Although he became partly blind as he reached old age, Ives continued his research, especially in the field of color photography, with his usual enthusiasm.

17,673,000 Miles Of Flies

How Long Would It Take To Kill Each One?

From May 1st to September 30th, it is estimated that a female housefly would have approximately 5,598,720,000 descendants! Supposing a fly is a fifth of an inch long and all these flies were laid end to end, there would be more than 17,673,000 miles of flies.

This sounds like a serious problem but, fortunately, they don't all live and people instead of bothering about putting them end to end, put them to an end once and for all.

And the best time to do the killing is when the flies first appear. Each fly killed then eliminates the danger of millions later.

Flies are a menace to health, they carry the germs of summer diarrhoea, typhoid and other dangerous diseases. Not a word of good can be said in their favour.

There's only one way to keep down the menace. Breeding places such as uncovered garbage, refuse, manure, rotting matter of any kind should be eliminated. Screens on doors and windows and coverings for all food and drink should be used. But, best of all, if flies do enter the home, have a few Wilson's Fly Pads placed around. If used regularly according to directions, they will kill all of the flies in short order.

Some people wait until they are requested to do things, and some others wait until they are requested not to.

Every 10c Packet of
WILSON'S FLY PADS
WILL KILL MORE FLIES THAN SEVERAL DOLLARS WORTH OF ANY OTHER FLY KILLER

10c WHY PAY MORE

Best of all fly killers. Clean, quick, sure, cheap. Ask your Druggist, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

Sensitive Instrument

New Earthquake Recording Instrument In Use At Ottawa

The Royal Society of Canada was told of a new earthquake recording instrument so sensitive it picks up vibrations of traffic several miles away.

Ernest A. Hodgson, seismologist at the Dominion Observatory in Ottawa, told the physical sciences section of the society the observatory has acquired one of the instruments of which there are not more than a dozen in the world. It is called the Bernhoff seismograph and makes a record of vertical tremors only, that is those shocks which start deep in the earth and travel upwards.

The recording is photographic. Vibrations of the instrument cause a beam of light to move up and down along a piece of photographic paper fastened to a revolving drum. In the Bernhoff machine there are two recording components, one for quakes of short duration and the other for those that last a long time.

One of the difficulties associated with older types of seismographs was that when the recording unit was opened the machine had to be stopped. The result was if a quake occurred during the operation, the record was lost and the operators left it alone as far as possible.

With the Bernhoff instrument, it will be possible for the seismologist to remove the record of a brief quake—they are usually more or less local—while the long-time record continues uninterrupted.

Dr. Hodgson said the machine cannot be operated at full sensitivity in Ottawa because it picks up tremors from the city almost continuously, tremors made by heavy trucks, passing trains or blasting.

It has been adjusted to work without such a hair trigger, but it is still sensitive enough to pick up a quake that might be felt anywhere in Canada or the United States.

A man isn't really old until he begins saying he feels younger than he did ten years ago.

TRY THIS NEW WAXED TISSUE PACK

PRESTO-PACK

Wrap Your Food

YOU'LL be delighted with the simplicity of Presto-Pack—a flat pack of waxed paper for kitchen use. Just hang it up on the wall. Then pull one sheet at a time as you require it. You can't pull any more because of the ingenious way it's packed.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

Modern British Destroyers Best Designed And Most Efficient For Their Type

Presence of 17 foreign warships alongside the 160 vessels of the British fleet at the Spithead review afforded a rare opportunity for comparison of their merits.

Hector C. Bywater, naval correspondent for the Daily Telegraph, discussed the craft at some length.

"A striking contrast is provided by the French battleship Dunkerque, which has only lately completed her trials. This 26,500-ton vessel with an overall length of 702 feet and a beam of 102 feet, is the last word in capital ship design as envisaged by French naval experts.

"Admittedly they were influenced by the Nelson and Rodney when planning the layout of main armament and control stations, but in all other aspects the ideas incorporated are purely French. The concentration of all eight big guns in two turrets is regarded by most British naval men as unwise.

"The German armored ship Admiral Graf Spee represents one of those specialized types which have no counterpart in our navy. While her design is a technical achievement of the highest order, it does not entitle her to rank as a battleship. Her six 11-inch guns should enable her to overwhelm any ordinary cruiser of her own size, 10,000 tons, and for that reason she and her two sisters, Deutschland and Admiral Scheer, have introduced a new and baffling factor into naval strategy, a factor aggravated by their speed of 26 knots and very extensive cruising radius.

"But the ships are too lightly armored to stand up to a capital ship and now that we and other countries are building 30-knot battleships the strategic value of the German 'pocket' type is diminishing. . . all the same there is food for thought in the fact that the British navy at the present moment has available only two vessels, Hood and Repulse, which could be depended on to hunt down and overpower a 'pocket battleship'.

"In the cruiser category the Japanese Asigara is the only vessel of real interest. But in naval architecture things are not always what they seem, and I doubt whether any British naval officer would exchange a county cruiser for an Asigara (even though the former are slower). Internally she is cramped and she carries so much weight she must be exceedingly lively in a seaway, making her a bad gun platform.

"The Roumanian destroyer, Regina Maria, and the Turkish boat of the same type, Kocatepe, were both built in Italy, the former to British designs. The Kocatepe has a contract speed of 38 knots as against 35½ knots of our latest destroyers. But whereas every British destroyer has to make its designed speed with full equipment on board, that is seldom the case with foreign-built craft. There is ample evidence that modern British destroyers are, ton for ton, the best designed and most efficient vessels of their type in existence."

Church Goes To Congregation

Argentine Padre Uses Boat Fitted As Place Of Worship

Getting to church has always been a problem on the delta of the Parana River in the Argentine. Churchgoers have had to ford many of the streams which thread the delta or miss formal worship. Recently the problem was at least partially solved. The answer, supplied by a practically minded padre, is the world's floating church. Now the place of worship, with its steeple, stained glass windows, padre and altar goes to the congregation. This floating church, 108 feet long, was built in the Argentine government's Buenos Aires shipyard. The hull is that of an old vessel. Scientific American.

Airship Nears Completion

Construction of Germany's new airship has reached its final stages. The L-Z130, designed as a sister ship to the Hindenburg, lost in the United States, had her metal skeleton nearly covered with fabric. Her pilot and motor gondolas, as well as the wireless cabin, were almost finished. Work on passenger quarters was being speeded.

Sensitive People

People Are Prone To Resent Any Kind Of Criticism

For five years, we are told, the present Mrs. Ruth Lininger Dobson lived as a girl in the Middlebury, Indiana, community of Amish, a sect of thrifty farm folk who have no use for modern inventions and who strive to keep their children on the land. Recently she wrote "Straw in the Wind," a novel whose characters are of the faith. Now, we are further informed, the Amish declare the book deals too harshly with them and they have risen in protest.

It is an old story. Americans well back in the last century became very wroth at Charles Dickens for picturing this country, not very inaccurately as we now are disposed to believe. Certainly he did to Americans no more than he had been doing to the British—and getting away with it. In more recent years we have seen representatives of almost every nationality rising up in protest against this or that play, motion picture or novel, even history, intended to depict their native lands or compatriots. Objections have been raised to the type of jokes, to the makeup of actors, to the tone of voice, to the portrayal of character and what not.

When Burns wrote, "O wad some power the giftie gie us to see oursel's as ithers see us," it wad frae monie a blunder free us," he was talking through his hat. Whenever it becomes in any way true we either become so self-conscious that we make worse blunders or we become so wroth that we justify the criticism and then some—the end being much the same whether reflection incites indignation or timidity. —Rome (N.Y.) Sentinel.

Expectation Of Life

Has Increased By Only Nine Months For Adults

It is no good thinking that because the expectation of life has increased 20 years, people can hope to live 20 years longer than their parents, because that will not be the case," said Mr. Sandys, M.P., in the House of Commons.

"The advance of medicine, surgery and hygiene has undoubtedly made a great improvement in the health of the nation, but it has made very little difference in the expectation of life of adults.

"The expectation of life of a man of 65 to-day as compared with a man of 65 in 1871 has increased by only some nine months. Where a change has taken place is in the extremely satisfactory decline in infant mortality.

"In the category of children under one year of age, the deaths have fallen from one in every seven live births in 1886 to one in every 20 live births in 1935. In other words, during that period infant mortality has been reduced by about two thirds." —Popular Opinion.

Wider Use For Insulin

Reported That It Can Prevent And Cure Common Colds

The use of insulin, discovered by Sir Frederick Banting, of Toronto, to prevent and cure the common cold as well as a host of similar infections was reported at the closing convention session of the American Laryngological, Rhinological and Otolological Society at Atlantic City, N.J. Insulin heretofore has been used chiefly as a treatment for diabetes.

Besides helping stop colds, the session brought out, insulin also has value in checking other watery nose discharges, bed sores, small surface ulcers, swollen ankles and middle ear infections of certain types.

Humming Bird Cannot Walk

The humming bird, smallest of all birds, migrates all the way from Alaska to Brazil. It can fly in any direction, even backwards, but it cannot walk. Crossing the Gulf of Mexico, it flies over 500 miles in a night.

A peculiarity that distinguishes the humming bird from all others is that it can fly backward. 2207

No Foundation For Belief

That All Types Of Business Always Make A Profit

A curious belief exists that on this continent, under what is called the "profit system," all businesses make money. They don't. Actually, according to the most authentic figures, one business out of five drops out of sight every year. It seems a pretty bad record, and sad, but there it is. Businesses fail, and while the reason for failure is generally indicated in some conventional phrase, like insufficient capital, over-expansion, extravagance, poor location, and so on, the fact is that every failure is an individual case with peculiarities all its own.

It is argued, and perhaps rightly, that an industry which cannot yield fair wages is without economic right to existence. Against that is the at least equal truth that there can be little gain for labor or for anybody else in strangling an industry which, struggling for a foothold in its beginnings, and with promise for the future, is killed prematurely by too great demands upon it. In other words, if capital must be prepared to make sacrifices and take risks for the chance of future betterment, labor, in its own interests, should be prepared—and permitted—to make sacrifices and take risks, too.

We have in mind an incident that just happened in Detroit. A manufacturing firm there announces that it is discontinuing its plant, which had employed 400 or more workers. It says:

"Although we have been told repeatedly by the U.A.W. (United Automobile Workers) that they knew more of our affairs than we did, the fact is that this operation has not been profitable."

The incident serves to show that in the era of collective bargaining that lies ahead labor owes it to itself and to the public to rise to its new responsibilities by a closer study and a more sympathetic understanding of the problems of management. A union does its members poor service when it insists on an increase in pay which, because it cannot be met, results in the closing down of a plant. —Ottawa Journal.

Where Drugs Are Sold

Judge Found Definition Of Drug Store After Long Search

It is well to have this matter settled by a high court, once and for all: "What is a drug store?" It is all to the credit of the learned jurist of the Indiana Supreme Court that he went into the matter thoroughly, delving into Burns' annotated statutes, Webster's new international dictionary, apothecary definitions, the Encyclopedia Britannica and even Shakespeare. For there have been sharp differences of opinion as to just what a drug store is. And what did the learned judge find? That a drug store, of all things, "is a store in which drugs are sold." —Springfield Union.

There are 10,446 miles of railroad in Sweden.

Soviet Five Year Plan Is Designed To Overtake And Surpass America

Things That Make England

Stanley Baldwin Speaks About Everyday Sights And Sounds

In a public address Stanley Baldwin said: "The sounds of England, the tinkle of the hammer on the anvil in the country smithy, the corn-crake on a dewy morning the sound of the scythe against the whetstone, and the sight of a plough team coming over the brow of a hill, the sight that has been seen in England since England was a land. The wild anemones in the woods in April, the last load at night of hay being drawn down a lane as the twilight comes on, when you can scarcely distinguish the figures of the horses as they take it home to the farm, and, above all, most subtle, most penetrating, and most moving, the smell of wood smoke coming up in an autumn evening—that wood smoke that our ancestors, tens of thousands of years ago, must have caught on the air when they were coming home with the result of the day's forage, when they were still roaming the forests and the plains of the continent of Europe. These things strike down into the very depths of our nature, and touch chords that go back to the beginning of time and the human race, but they are chords that with every year of our life sound a deeper note in our innermost being. These are the things that make England."

Old Idea Is Wrong

Brain, But Not Eyes, Gets Tired With Constant Use

A new method of locating obscure brain tumors by measuring accurately the reactions of the eyes to light was announced by Dr. Charles A. Elsberg, of New York city, before the American Neurological Association.

Some tumors of the brain have been located by observing the ability of the iris, or light-regulating mechanism of the eye, to react to light, he explained, but the new method consists of measuring to a high degree of accuracy the response to definite light intensity or to a flickering light which "tires" the eye.

The flickering tests also have indicated that the familiar phrase, "My eyes are tired," is not true, the New York specialist said, because the nerves of the retina and the optic nerve do not grow weary with use. Instead the brain itself tires and fails to send back responses to the light messages it receives.

Experiments with light intensity also have shown, he went on, that straining the eyes in a heavy fog or at night actually enables a person to see better.

Our word "influenza" is derived from the Latin language. Its source is a word meaning "to influence."

A Seamless Knit on a Round Needle

Household Arts by Alice Brooks

It's Mainly Plain Knitting

PATTERN 5601

All eyes on this knitted two-piece! So summery, in white or pastels, it's done mainly in stockinette stitch, with a lace stitch defining its "sunburst" yoke. Use a round needle and there'll be nary a seam to sew or show. You'll love it in either nubby cotton yarn, a combination of wool and rayon, or in Shetland floss. And of course you'll want to wear it both with and without its matching skirt! In pattern 5601 you will find instructions for making the blouse and skirt in sizes 16-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The Soviet Union's third five-year plan, designed this time "to overtake and surpass America," was taking form in the hands of the nation's industrial leaders.

It probably will go into effect next Jan. 1, immediately on completion of the second five-year plan.

Preliminary data indicated there will be no let-up in the intensive, all-absorbing drive to industrialize this technically backward nation within a single generation.

In the offices, drafting-rooms and shops of 1,000 Soviet trusts and industries, the planners were blue-printing the next phase of the industrial future.

Although the plans which must be submitted to the Kremlin by July 1 are incomplete, figures published indicate the government hopes to accomplish more in the third period than the combined achievements of the first and second five-year plans.

The second plan already has been pronounced a success by Soviet officials, and industrial architects are looking forward to the seventh and eighth five-year plans that will not be finished until 1960 and 1965.

The planners assume a population increase of 125,000,000 within the next 25 years to raise the present 175,000,000 to 300,000,000. The Russian birth rate has nearly doubled since the 1936 decree encouraging large families.

The prime goal of the next period will be increase of Russian labor's productivity, still admittedly inefficient. Russians already are a little disdainful about the rest of Europe, asserting that in key industries they lead all other European nations.

As during the first two five-year plans the great phases of the third period apparently will be on capital goods construction, transportation, electrification, canal construction, airplanes and automobiles and mining.

The Soviet Union hopes to lead the world in gold, coal and steel production, civil aviation and agricultural production before 1942. Leadership in tractor and threshing combine production already is claimed, and airplane production is believed to be ahead of any other country.

Program For Safety

Worst Roads The Safest For The Crazy Modern Driver

"The narrowest, crookedest, and roughest roads are the safest for the crazy modern driver. Why not build them that way?" The question is asked by Captain A. Brandt, who is Highway Commissioner for New York State, in a program that he suggests for eradicating road deaths. Other points in Captain Brandt's proposals are:

Removal of all roadside inns and taverns. Policing of all roadside parking places to prevent anyone who has had a drink from driving a car.

Periodic sanity tests for drivers to find out why a person perfectly sane otherwise immediately goes crazy when he gets behind the wheel of a car.

"Everybody," declared Captain Brandt, "thinks that a wide, straight highway is an open invitation to 70 or 80 or even more miles per hour. Thus, our best roads, so called because they are wide have become speedways. The truth about it is that deaths occur on the straightest and finest sections of the road, not on the worst." —Banffshire Journal.

An Interesting Review

The progress of human knowledge during the last 200 years will be reviewed and the possibilities of the future will be indicated by many of the world's leading scholars at a series of institutes and symposiums to be held in 1940 in connection with the celebration of the University of Pennsylvania's bicentenary.

Ancestors of the present-day ostrich had more than two toes. But too many toes are a hindrance to swift running, so the useless members gradually disappeared. Now the ostrich has a foot that is designed for both speed and power.

J. E. Gooder - Editor & Manager

The World of Wheat.

By H. G. L. STRANGE
Director "Crop Testing Plan."

What is Canada's most valuable
natural resource?

Some say the top six inches of
soil, some the sunshine or the hot
days and cool nights, others the
coal, copper, lead and zinc, mines
and the oil wells, - still others
plump for the wealth of the forest
and of fish in lakes and streams.

For my part I suggest that twelve
inches of rain which on the average
falls during the autumn and growing
season months over western Canada,
forms our greatest natural resource.
How valuable it is can only be
fully be appreciated when it fails to
occur, and so when we suffer from
drought, consequently in turn from
poor crops, or, worse still, from
complete crop failure.

Unfortunately, only 50% of this
precious rainfall, scanty as it is, is
available to the wheat plant; 25%
is lost by evaporation - this is prob-
ably unavoidable - but 25% is also
lost by weeds which, it has been
calculated, decreases the yield about
35%.

Obviously, then, it seems that one
of the best ways to increase crop
yields, which would actually be the
equivalent of increasing the rainfall,
is to eliminate the weeds.

Following factors have tended to
raise price: Further rust reports
in U.S. winter and spring wheat
areas, considerable damage in U.S.
midwest - Precipitation needed in
U.S. and Canadian spring wheat
areas with serious situation develop-
ing on Canadian Prairies - Argentina
corn estimate reduced - European
political situation very unsettled -
Expect very small U.S. wheat carry-
over - Australian orange crop below
average - European prune crop
smaller.

Following factors have tended to
lower price: Poor European de-
mand - Russian winter and spring
wheat prospects satisfactory - Favor-
able seed weather in southern hemi-
sphere - Heavy yields in U.S. south-
ern winter wheat territory - Pros-
pects for wheat harvest in northern
hemisphere, excluding Russia,
slightly larger than 1936.

M.B.C. Church Notes.

Next Sunday evening, July 11th,
at 8 p.m. in the Community Hall,
east of town, will be held an evan-
gelistic service. All are invited to
attend.

The M.B.C. Camp Meeting will
be held at Didsbury from July 16th
to 17th. Watch for further notice.

WEEKLY JOKE

"Good morning, have you had a
nice rest?" the landlady asked her
new roomer.

"No," was the reply, "your cat
kept me awake."

"Oh," said the landlady, "I hope
you are not going to ask me to have
the poor thing destroyed."

"Not exactly," said the mild
little man, "but would you very
much mind having it tuned?"

Melvin Notes.

Too late for last week

Miss Bertha Good, Garfield, was spending a few days with Misses Beatrice and Sarah Landeen.

It was with regret we heard of the death of Mr. Harry Bricker. Sympathy is extended to the family. Mr. and Mrs. Bricker were residents of the district some years ago.

Mr. Godfrey Carlson and daughter Mrs. Daniels visited the former's mother, brother and family at Drumheller over weekend. Mr. Carlson drove back a new car. How about a ride in it, Godfrey?

Melvin Girls' softball team played the Clovermount Girls at Melvin on Monday night (June 28), Clovermount taking the honors. Tuesday night Melvin men's team played at Clovermount, the latter men's team proving winners.

Sunday guests with Mr. and Mrs. Peter Johnston were Mr. and Mrs. W. Shultz from east of town and their friends from Pennsylvania, Mr. and Mrs. Hugh Morton, Miss Ruth Johnston, the Gatchen Boys and J. Martz.

Current Items

Miss Margaret Shannon was the Sunday guest of Miss Helen Wahl.

Don't forget the Ball Tournament and Sports at Melvin Ball Grounds on Wednesday, July 14th.

Mr. and Mrs. N. S. Clarke and Mr. and Mrs. Chas. Youngs spent July 1st with Mr. and Mrs. E. Parker.

Mr. and Mrs. Emil Krebs were Sunday visitors at Cremona with Mr. and Mrs. Rands.

School is closed and Miss Hazel Ray is attending summer school in Calgary.

Miss Dorothy Youngs, of Butte School, is vacationing at her home here.

Miss Ruth Johnston of Didsbury Hospital staff is spending a month's vacation at her home here.

Mr. P. Daniels, Calgary, was a weekend visitor with Mrs. Godfrey Carlson, Mrs. Daniels returning to the city with him.

Saturday the Clovermount men and Melvin men clashed in a softball encounter at Melvin, the latter team emerging victorious.

A number from Melvin took in the S.C. picnic July 1st at the Little Red. A goodly number also saw the Parade in Calgary this Monday.

Mr. and Mrs. Jim Adams spent Tuesday with Mr. and Mrs. Chas. Youngs, Mrs. Adams remaining for few days with friends in the district.

The rafters for the roof of the new Hall were raised Saturday. Now everything is in readiness for all the help that can come this way. Thanks in anticipation.

Misses Maud and Laura Johnston, Bessie Walker, Dorothy Youngs, Harold and Jim Johnston, drove to Calgary on Sunday. Miss Walker has been guest at the Johnston home for a couple of weeks.

Sympathy is extended to the Summers family. Their mother passed away in the Holy Cross Hospital on July 5th. Mrs. Summers resided in the district for a number of years. Shaver's Funeral Home, Calgary, has charge of the funeral, which will be held today (Thursday) in the city at 2 p.m. The late Mrs. Summers was a true friend and a kind neighbor.

The "PIONEER"
Can Do It!

Burnside Notes

Messrs. George and Dick Metz were Calgary visitors on Friday.

Saturday evening guests of Mr. and Mrs. Otto Faas were Mr. and Mrs. N. Eckel.

The postponed Lone Pine Picnic will be held today (Thursday), July 8th. Dance in the evening.

Fred Metz spent several days taking treatment in Didsbury Hospital last week.

Dave Jenkins, of High River, and Denis Jenkins of Elmore, are visiting their home here.

Mr. and Mrs. Albert Arlenson and daughter Connie are visiting Galahad friends.

Miss Una Jenkins is spending the week in Calgary and taking in the Stampede.

Mount Olive baseball team came over to Lone Pine on Sunday last to play a friendly game. The final score was 26-9 in favor of the locals.

Jack Clark and Idris Jenkins teachers at Antler School, and Sid Gilson of the Jutland School, are in Calgary attending summer school.

Mr. Bill Wulawka who spent the last five years in this district, left for Winnipeg on Saturday afternoon upon receiving word of the death of his uncle there.

Mr. Fred Ronquist, local painter and paperhanger for this district, left on Tuesday for the University Hospital at Edmonton to have an operation performed for removal of a tumor which formed after removal of a tooth.

Holiday Down by the Sea

The Maritimes, where Canada begins, offer a combination of holiday attractions that have made the three sea-girt provinces very popular among Canadians and Americans alike.

The rare mixture of historic sites, scenic beauty, and opportunities for all types of out-door sports gives New Brunswick and Nova Scotia an unusual attraction for visitors.

The Algonquin Hotel, at St. Andrews-by-the-Sea, holds its place as New Brunswick's leading resort by virtue of its splendid position on the bay of Fundy,

its two fine golf courses, and its facilities for fishing, boating, and other sports. Open from June 26 to September 7, the Algonquin is particularly popular among Americans because of the nearness of President Roosevelt's summer home at Campobello.

Across the Bay of Fundy—a delightful trip by the steamer Princess Helene—from Saint John to Digby, lies Nova Scotia. Visitors are always interested in that section where the poignant story of Evangeline was enacted. Canadian Pacific Railway hotels at leading holiday points in Nova Scotia in-

clude: The Pines, at Digby, open from June 25 to September 11; Lakeside Inn, near Yarmouth, open from June 28 to September 7; and Cornwallis Inn, at Kentville, in the heart of the Land of Evangeline, open all year. Chief amusements at these resorts are golf, tennis, motoring, sea fishing, boating, and bathing. The pictures above show Evangeline Well at Grand Pre; the "Princess Helene" which joins Nova Scotia and New Brunswick; Katy's Cove at St. Andrews-by-the-Sea, N.B.; a typical Nova Scotia fishing schooner; and a social gathering at Lakeside Inn, Yarmouth, N.S.

WORLD HAPPENINGS BRIEFLY TOLD

Several ships of the navy's America and West Indies station will spend part of the summer in Canadian waters.

Loans under the Dominion Housing Act at June 5 exceeded \$8,000,000. Hon. J. L. Ilsley, acting minister of finance, announced.

The French air ministry has decided to call off the New York-Paris air race and award the prize money to the winner of a Paris-Damascus-Paris race.

Exchange visits between thousands of German and French children this summer to promote international understandings were announced at the 20th annual convention of Rotary International.

Tuberculosis victims who endanger people around them will be given compulsory treatment under a provincial plan soon to be put into effect, Premier Mitchell Hepburn of Ontario announced.

Unemployment in the United States declined in April to 6,981,000, lowest for any month since the summer of 1931, the national industrial conference board, a research organization sponsored by business corporations, reported.

Stanley Baldwin, who has become Earl Baldwin, has chosen the surprise second title of Viscount Corvedale. Corvedale is a Shropshire valley near the village of Much Wenlock where the Baldwin family was founded 300 years ago.

Sir Edward Beatty announced the Canadian Pacific Railway Company would place an order for two new liners for the service between Canada and the Antipodes if necessary financial guarantees were forthcoming.

The London Gazette announced the king had appointed his sisters-in-law, The Duchess of Gloucester and the Duchess of Kent, to the Imperial Order of the Crown of India. Other feminine members of the royal family, including Queen Maud of Norway, already hold the Crown of India order.

Indicates Land Near Pole

Russian Expedition Reports Seeing Bird Fly Over Camp

The Soviet north pole expedition announced it had found bird life close to the pole and that this had led its scientists to discuss the possibility that undiscovered land exists in the polar sea.

Members of Dr. Otto J. Schmidt's party maintaining a 24-hour watch at their outpost near the earth's axis reported sighting a guillemot, a black and white sea bird which abounds on north Atlantic coasts, flying over the camp.

A Moscow zoo scientist said the presence of birds usually indicates proximity to land, which is not known to exist in the vicinity of the pole.

Very Old Silver Coins

A hoard of silver coins bearing the inscription "Ethelbert Dux Anglorum" has been found by peasants digging in a field near the Polish village of Rakoczyn. Ethelbert was one of the Saxon Kings of England, from A.D. 858 to 866. During that period Scandinavian Vikings raided coasts of England and the Baltic countries.

The Honor Roll

Thirty-one Publications In Canada 87 Years Or More Old

In a country as young as Canada, one does not expect to find many individual business enterprises with a history going back as far as 1850. Yet the Canadian publication industry can boast of 10 daily newspapers, 17 weekly newspapers, three religious periodicals and one magazine, all in active operation, that had their beginnings earlier than the middle of last century. That makes 31 publications, each of which is 87 years old or older.

And if the honor roll were to begin at 60, there would be 204 publications that would qualify, 199 of them being in Eastern Canada, the part settled first. To-day there are many media available to advertisers, but none with the long and distinguished record of useful service, both to advertisers and the public, that is the boast of the press of Canada. Sarnia Observer.

Will Visit Denmark

Lindbergh To Attend Conference Of Scientists In August

Colonel Charles A. Lindbergh and Professor Alexis Carrel are going to Denmark in August to continue the conferences with leading scientists that were begun last year when they demonstrated a model of Colonel Lindbergh's "artificial heart," it was announced by Dr. Albert Fischer, Denmark's foremost cancer specialist.

Dr. Fischer said the trip was planned in connection with important physiological studies of human tissue.

The artificial heart has been left in the custody of the Copenhagen Biological Institute.

Makes Unsatisfactory Meal

Belgian Congo Cannibals Find White Man Tough Eating

Henry Moser, a Mennonite missionary of Berne, Ind., returned to New York from the Belgian Congo with the cheering news that cannibalism is on the wane. Besides, he said, natives find white men unsatisfactory because of the toughness of the meat. "A native said that darker meat was much softer."

Moser said it was difficult to spread the gospel because of the Christian stricture against polygamy. Wealthy natives insist on 60 or 70 wives, he explained, and even poor men have three or four. A jug of palm wine can usually be exchanged for a wife.

Starting A Frog Farm

French-Canadian Has Bought Land In British Columbia

T. H. Barbaree, New Westminster real estate agent, said he had sold 20 acres of land near White Rock, B.C., near the international boundary, to a French-Canadian "frog" farmer.

Mr. Barbaree said the purchaser intended to stock the ranch with eastern frogs for foundation stock of Western Canada's first table-frog farm. He declined to give the name of the purchaser.

Human eyes are called upon for more severe visual tasks to-day than ever before, due to the increased use of mechanical equipment and to increased speed.

Poland has 13,491 miles of railways.

MAKE THIS MODEL AT HOME—SLENDER LINES AWAIT YOU

By Anne Adams

A dainty frock that you can wear any time—any place, is this slenderizing Anne Adams fashion for the matron whose figure has fallen into "lines of least resistance"! Pattern 4359 owes its distinctive charm to its nicely cut sleeves (see how gracefully they flare!) a daintily curved yoke, and a skirt panel that seems to reduce your hips to a minimum! And do note the unusual tie-ends at the low V-neck! Women who've had little sewing experience will be delighted with the ease with which this clever style may be made. Lovely in dainty flowered triple sheer or voile.

Pattern 4359 is available in misses' and women's sizes 16, 18, 20, 24, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3 3/4 yards 39 inch fabric and 1/4 yard contrasting tie. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

A Study Of Importance

Nutrition Plays Big Part In Promoting Health And Preventing Disease

Although a recent introduction to public health service, nutrition's role is already important, Prof. Grant A. Fleming, Dean of Medicine at McGill University, told delegates who were in Montreal for the second annual convention of the Canadian Dietetic Association.

Addressing the gathering on "the part the dietitian plays in public health," Prof. Fleming said nutrition plays an important part in the prevention of disease and promotion of health—two main functions of public services. Efficient public health service can postpone fully one-third of all deaths, he said.

"Mental and physical health are so closely bound together as to be almost inseparable, and both of them are essential to economic welfare. Physical health can be promoted by the dietitian by dissemination of information on use of food for health's sake. Advantages of a balanced diet, and properly prepared food are obvious, but it is the dietitian's duty to spread that knowledge."

Isolation Is Impossible

It is as hard for a nation to be truly isolated in the world to-day as it is for a man to be a hermit at Forty-second and Broadway states the New York Post. The fact that a man named Adolf Hitler took power in Germany and started an armaments race may affect the business of a real estate man and builder in Queens and the plans of a low-cost housing enthusiast in slum areas.

Magistrate (to motorist charged with speeding)—I suppose you have half a dozen good stories to excuse your offense?

Motorist—Yes, your Worship. Stop me if you've heard this one.

Propagating Wild Ducks

Organization That Proposes To Spend Large Sum On Duck Conservation

Duck hunters will never go without their full bag if recently announced plans of "Ducks Unlimited," an organization that proposes to spend \$3,000,000 on duck conservation and hatching, do not go astray.

A system of artificial incubator hatching in Delta, Man., on Lake Manitoba, has met with such success that W. G. Ross, one of the organization's four directors, announced "there is no reason why each of the prairie provinces cannot hatch 1,000,000 ducks a year."

Installation of three large incubators, each with a capacity of 1,000,000 in the three prairie provinces, has been proposed. The incubators would be filled with the first setting of eggs "stolen" from the nests. The duck would then be allowed to hatch her second family, thus doubling the size of the brood.

"Our experience in Delta has proven to my complete satisfaction that there is positively no reason for any species of duck becoming extinct," Mr. Ross said. Every species can be produced artificially in quantity using the methods we have used at Moose Jaw. Canvasback, red-head and bluebill are the easiest eggs to hatch, and the birds rear themselves if not disturbed too much," Mr. Ross added.

Had Many Adventures

Winnipeg Man Was Animal Trapper, Soldier, And Cowboy

Charles Goodyear roved the world and adventured in strange lands before settling down to quiet life in Winnipeg 31 years ago. Now he is 85 years of age and expects to round out a century.

He ran away from his Hertford, England, home at the age of 16 and went to the United States. On a Wyoming ranch he pursued and killed cattle-rustlers and for a time worked in Buffalo Bill's Wild West Show.

In 1870 he enlisted with the French in the Franco-Prussian war, was captured by the Germans and taken to Berlin. There he met Carl Hagenback, wild animal trainer, who commissioned him a few years later to trap wild animals for his circus in South Africa.

He joined the Australian gold rush, fought in the South African war and was stabbed by a Chaco Indian in South America.

Malaria caused his physician to order him to live in Manitoba in 1906. He speculated in real estate and made and lost a fortune.

Canada Makes Good Showing

Has Six Of Gold Mines Listed Among World's Greatest

Listed among the world's "greatest" gold mines are 53 and to get into that list a mine must produce at least 100,000 ounces of gold in a year. Canada has six in the circle, all of them well-known. They are: Lake Shore, Teck-Hughes and Wright-Hargreaves at Kirkland Lake; and Hollinger, Dome and McIntyre-Porcupine at Porcupine. The greatest gold field in the world is at Witwatersrand in South Africa. There are 35 mines there which rank as among the "world's greatest." The field produces 1,400,000 ounces of gold in a year—Ningara Falls Review.

Chooses Canadian Doctor

Ontario Man To Establish Medical Laboratory In China

Dr. Clifford Chapman, department of national health, Ottawa, and former demonstrator at the University of Western Ontario, London, has been chosen by the Chinese government to establish a medical laboratory and teach pharmacology under the national health administration at Nanking. At Ottawa he has been doing hormone research work.

Won Contest Easily

Lulu Nethaway of Sargent, Nebraska, entered a contest which offered a prize to the person having the "biggest anything." She entered this list of jobs she has held: Actress, author, chiropodist, dramatic coach, entertainer, governess, investigator, Masseuse, model, music teacher, pianist, practical nurse, radio announcer, reporter, saleslady, saxophonist, seamstress, typist and usher.

THE CANADIAN ADVENTURE TRIP OF BOB SIM, AN ONTARIO FARM BOY

No. 2 of a Series of 16 Letters

Bob visits Montreal—attends Canadian Youth Congress—and yawns with the policeman on Parliament Hill, Ottawa. Where will he be next? Will the flier hold out?

He's only a boy and sees things through young eyes—perhaps he'll give you new ideas!

Parliament Hill, Ottawa, Ontario. (Special Despatch by Bob Sim).—I am writing from a park bench on Parliament Hill. Deep down in the valley pour the angry waters of the Ottawa river; behind me are the massive buildings of the capital. Inside the Gothic doorway of the Parliament Buildings stood three huge policemen. They had obviously nothing to do, and were exhausted with idleness. They all yawned copiously when I asked the way to the House. At Ottawa one looks for political grafters and provincial shysters, but the Hill is as guileless as an archbishop, and as stately as a cathedral. I haven't seen a suspicious character; they all must be at the Coronation. The House, of course, is not in session, so I went in and sat in the speaker's chair, and stood behind the prime minister's desk. I also tried the chair of our own member, Miss Agnes Macphail. It is very comfortable.

We left Toronto at five in the afternoon; it is 360 miles to Montreal, so we were driving most of the night on an all paved highway. Toronto and Montreal are Canada's biggest cities. Farmers often imagine that people who live in these cities are superior individuals. But I am beginning to doubt it. Two of the Toronto people who travelled with me to Montreal had never been east of Oshawa; Hamilton was the only other city they knew but they insisted that Toronto was the best city in the world. Then in Montreal I had to ask six of the natives before I found one who knew how to get out of the place. From Ottawa to Montreal is 126 miles on fine paved highway.

Canadian Youth Congress

I attended the second annual Canadian Youth Congress at Montreal. Delegates to the congress, almost 1,000, represented various youth organizations across Canada. They held all shades of opinion; Protestant, and Catholic; Conservative and Socialist; French speaking and English speaking. I wish those who think youth flippant and irresponsible could have been there to see how earnestly this great assembly faced their obligations as citizens. Similarly those who think the congress Communist should have seen the demonstration of enthusiasm when the resolutions were passed overwhelmingly affirming belief in God and the right of the individual to private property. Due largely to the resolutions of last year's congress the Federal government has voted one million dollars for the rehabilitation of youth. This year there was a great deal of discussion about how it should be spent. Although half of Canadian youth is rural, less than 10 delegates were from farms. Two of these were from Ontario, one from Alberta, and five from Saskatchewan. With such a miserable representation we farmers cannot expect to receive fair treatment when this money is distributed.

It was depressing to hear of farming conditions in the West. I will save these stories for my letters written from Western Canada. It was still more depressing to realize that six provinces had no farm representation at the congress.

Farming In The Ottawa Valley

"Welcome to the Ottawa Valley." This was the greeting I received at the farm home of the McCulloughs, who live about 20 miles from Ottawa. The valley was settled largely by the Irish in the early days, to such an extent that the evident brogue is now known as the Ottawa Valley accent. Around Ottawa the soil is rich and black, devoted largely to gardening; farther out it is lighter, and dairying is the staple industry. Montreal used to take most of the milk in this area but this has been replaced by cheese-making.

Where Now?

Last week you remember, I promised to write this letter from Quebec city—so this time I make no promises, except to say I'll be writing from Eastern Canada.

Marking Live Stock

The Farmer's Advocate says some men cannot identify their own live stock when it is in the stable let alone after it has been five or six months pasturing on the back fifty or on some rented pasture. The tag put in the ears of tested cattle by the Health of Animals Branch has helped to identify animals on many occasions. The born stockman knows every individual and its breeding whether it is tagged or not.

IRON and COOK The Coleman Way

Coleman Irons and Coleman Hot Plates make and burn their own gas, using 94% less than ordinary fuel. They enable you to iron and cook with the convenience of city gas at low cost.

Coleman Irons are self-heating and instant lighting. No cords or connections needed... use them anywhere. Costs less than 1/2¢ an hour to operate.

Coleman Hot Plates are ideal for farm homes, summer cottages, camps, etc. Instant lighting. Made in 1-burner and 2-burner models. Prices begin as low as \$7.70.

THE YELLOW BRIAR

A Story of the Irish on the
Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas
Allen, Publisher, Toronto.

CHAPTER VI.—Continued

By the dawning, the mourners felt cold and stiff, after spending the night seeing Jimmie through the first heel of his long journey; and they were not wishful to burn up much daylight over the dead body of a man who had been called out of the way into glory. As a final mark of respect, bright and early in the morning, the coffin was hoisted on the stout shoulders of the men, who, changing off as the miles slowly went by, bore it at long last, and by the longest route, to its grave up the steep boren at Centreville. Most willingly did the whole countryside augment the toils of their tired bodies by trailing and straggling after the bier, wailing and chanting their griefs.

During the wake, a tall young girl had sung us a keen of the Crockey Boy in the time of The Troubles, which brought tears to every eye. The deep hood of her dark-blue cloth cloak flung back on her shoulders bared the raven-black hair of a Munster peasant girl. She sobbed the boy's farewell to his old mother as he told her:

"At the siege of Ross did my father fall.
At Gortie, my loving brothers all.
I'm going to Wexford to take their place
To free my nation and my race."

Then, soft and low, she followed the tramp of his brogues to the church to make his confession to the holy father. The time seemed to take the natural gait of its subject:

The boy, he entered the empty hall.
What a dismal sound makes his light footfall!

In a silent chamber, dull and bare,
Sat a vested priest in a lonely chair.
The youth, he knelt to tell his sins.
At Confiteor Deo, the youth begins.
At Mea Culpa he struck his breast.
In broken murmurs, he tells the rest.
"I have no hatred against living things,

I love my country above my king.
So bless me, father, and let me go
To die if God has ordained it so."
The priest said naught...
With sparkling eye, the youth looked up.

The robes fell off, and in scarlet there
Sat a yeoman captain in a fiery glare.

Her voice rose in a wail as the keener told of the heavy-booted soldiers dragging the youth from the altar to be hanged and quartered.

A dirge like that was as a tuning fork in my youth to strike the true note of Irish feeling. In the heart of every Celt whose bare feet had trod on Irish soil there was a hatred of English rule—not of England herself, mark you, nor of the English people

—but a black-hearted hatred of English rule in Ireland so sizzling hot that it scalded the blood streams. The causes of Ireland's bitterness and woes may be arguable, of course; but not with any profit by men of Irish blood whose emotions have been aroused. Nothing then is, but feelings makes it so. (Holy, jumping, suffering cats!—old John Trueman would say to that.) In my boyhood days, every emigrant ship brought to Canada the seeds of poisonous, ancient strifes; and it is the merciful providence of God that such wickedness and bigotry failed to thrive long in the sweet, virgin soil of the most tolerant country in the world. But in their short day they made an ineffaceable impression on the pioneer life of the Ontario countryside.

Revolt was endemic in Ireland throughout the last century, and English rule was maintained in the island by the constabulary and the military—ably assisted by the esculent, farinaceous tuber. The police and the garrisons cowed the spirit of the populace, and an ill-balanced diet of potato weakened the resisting power of the Irish Celt.

Yet in view of the large Celtic Irish migration into British America in those days, it must be apparent to everyone that Canada could not have survived as a British kingdom had it not been for the sincere loyalty that grew up in Irish Catholic hearts toward the struggling young country and her English queen. The truth is man is capable of a divided allegiance. He can be an Irish rebel and at the same time a loyal Canadian subject of the king. As with the saddle-bags of the Methodist circuit rider, there may be two separate compartments to the heart. In Canada, and as a Canadian, Paddy Slater never found any trouble loving both his country and his king; because in Canada, the crown stands for nothing less than the decent and respectable public ideals of a kindly-minded and democratic people.

Of course, it was old Victoria Regina that brought this mystery to pass. For sixty odd years the great queen reigned as truly a goddess in the minds of the small children along the St. Lawrence and its great feeding lakes as had the divine Mother Hathor, in old time, in the minds of the Egyptians of the Upper and Lower Nile. Regina was all powerful, and she dwelt remote as a goddess should. The queen stood for every possible sort of goodness. The children prayed for her, and in diverse ways we prayed to her. Her face may not have launched a thousand ships, but it was the face on every coin a youngster clutched in his gummy fist; and in her name, and for her honor, generations of Canadian children had a glorious holiday that ushered in the most beautiful season in the Canadian year. Her transcendent virtues may have been a myth, but as true as God's word, they firmly established a great kingdom in America, which circumstance, as you'll admit, is one of the wonders of the world. Young folk nowadays read snippy things about the old queen, but old men and women will feel what I am trying to say!

So it happened that for years Paddy Slater was a stout tory in Canada, and, in the man's day, a great supporter was I of Old John A. (Rt. Hon. Sir John A. Macdonald, leader of the Conservative party and Prime Minister of Canada, 1878-1891). Yet I found on several occasions that my loyal sentiments would not stand a sea voyage. No sooner did Paddy's feet feel the cobbles of Dublin and the cry of caller herring strike his ears, than the heart of the man gave a leap like a goat, and he became an Irish patriot and rebel again. Boise yuhd, ma vournel! Erin go bragh! (Victory to you, my darling! Ireland for ever!) Putting a conquered people to the sword—as the Jewish Jehovah sometimes directed—would have been a deal more kindly than crowding dispossessed peasants into rough ground like Connemara or obliging an entire subject race to live through centuries in the dire misery and carking poverty of the mud tenants hovels of Ireland. The pig, the barley, the butter and the poultry went to the towns and to England to pay the rent; whilst the Irish tenant lived on potatoes and a drop of the buttermilk. Even the year of the great famine saw a heavy export of food products from Ireland. To the great mass of the inhabitants, the British crown has always stood in Ireland for misrule and oppression.

Ireland has made an unhappy front-shop window display of British rule. However, let us thank heaven the arrogant Irish Celt has never had a chance to found an empire for himself—and disgrace us all entirely.

CHAPTER VII.

How times change! Nowadays, it is a fat Methodist who comes with a motor hearse to take our bodies to the graveyard; and if the dead Catholic is an elderly man, among the pallbearers you will notice one or two Orangemen looking a trifle awkward. With a sharp eye to business, that undertaker-man sends me a fresh calendar every New Year's; and he has the politeness to mark each fast day with the picture of a little fish.

At Martin Kelly's, every day was a fish day for me. In the spring spawning season, he had bought him a wagon-box full of fish in the sucker run; but the salt had been a trifle late in coming for the curing. Even with a tasty bowl of boiled potatoes sitting beside it with their great brown coats on, let me explain that a piece of soggy bone-shot sucker makes a mean principal meal for the day. Not that Martin Kelly and his wife themselves ate much of the rotten fish. In those days, no matter how humble the Irish Catholic home, hired help and such like always ate at a separate table.

But at that, I made shift to get along on food that was better, perhaps, than Martin himself had eaten as a lad. In the morning, I had my macquashter (porridge cake); at the noon hour, came the boiled fish and potatoes; and for supper, I had some strabout with a bowl of buttermilk. Fast days, however, were an extra trouble to me about the Kelly place. There was no clock or watch to tell the time; and, during the day, Martin, for that purpose, considered the place of the sun in the heavens. Before I sat down to eat on a fast day, the man's scruples for my conscience required that I point out to him a star in the heavens as evidence that night had actually come. Did you ever notice that stars have a way of shaking in the sky?

I would probably have stayed on at the Kelly place, and grown up to cobble shoes through life, like other great thinkers, had it not been for the wicked disposition of the O'Leary heifer. At an evening milking, the young cow was cross and uneasy because of an injured quarter. Perhaps I was a little rough in stripping her; at any rate, she measured her distances accurately and by stealth, and then she hit me a wicked kick in the pit of my stomach; a vicious pucker it was, that knocked the wind clean out of me, and sent the milk pail flying. As I lay gasping for breath, Mrs. Kelly let a scream out of her at the loss of the good milk; and Martin promptly hauled me into the house by my lug to attend to my requirements. I was given a sound beating; and that night I went to bed without my stir-about.

It was in the full of the moon; and an empty stomach helps to rake up annoyances. No wonder it is a wrinkled, cynical face that leers in through windows in the quiet watches of the night. The man in the moon knows all about the joys and sorrows of the human kind. It is during his hours for riding the heavens that their young are born; and the silly creatures also do their love making in the pale moonlight. In the hour before the dawning, our worn bodies stiffen and our souls depart. The moon listens to the cries of the afflicted; and, like a ghostly father, hears the confessions of our tortured souls. And the bitterest of human heartaches, the moon man can tell you, are caused by the cruelty and injustice of those in authority.

Why, I asked him, should a lad be beaten because a cow kicked over the milk pail? I put a listening ear on myself and waited till the quietness down below was disturbed by Martin snoring fine and easy. No answer being forthcoming to my question, I tied my few things together with a cord, and dropped them through the window. I might have been stepping on eggs so gentle was my tread. I followed after them, and slipped away up the 3rd line, to let Martin Kelly beat his old pan and holler his head off in the morning. In the dint of my long journey, I was scared for awhile because I saw a man walking ahead of me; but I discovered at last it was only my shadow the full

GET the most for your money. Firestone tires, with all their extra features for longer and safer mileage, do not cost one cent more than ordinary tires. Only Firestone tires have Gum-Dipped Cords with 58% longer flexing life. 2 Extra Cord Plies under the tread make them safe at any speed. Firestone

GUM-DIPPED TIRES

"MOST MILES PER DOLLAR"

moon cast before me on that turning of the road.

At cock-crowing time, William Marshall found me sitting on the wash bench at his back kitchen door.

"I have run away, I have, Mr. Marshall," I told him, "because the man beat me for the cow kicking the pail over." And I showed him the swollen wheals on my back.

"It's heart scalded I am to be troubling you, sir; but if you'll let me stay with you, Mr. Marshall," I pleaded with him, "I'll be a good Catholic boy, and I'll work hard for you."

"Don't worry, Patrick, we'll see about that," he told me in a kindly tone.

"Oh! Mr. Marshall," I cried, crossing myself, "if you only'll keep me, naught will I ever do to hurt you!"

At breakfast time, Mr. Marshall and his wife were having a quiet talk on the side. Oh! me, Oh, my! those dainty, well-buttered slapjacks soused in maple syrup!

"Indeed!" said Mrs. Marshall, in a louder tone, "it is not in our house we'll ever begrudge a child the bite of bread he'll be eating."

"You'll be a good boy, won't you, Paddy?" she asked me pleasantly, "and you can be doing the chores at the school for Mr. Michael Hughes, and you might rid up his dirty cabin."

The tongue on that woman did be so soft and sweet that she did be drawing the secrets of the world out of men and little children.

(To Be Continued)

If War Should Come

Products Of Canada Will Be Bulwark Of Safety For England

Arthur G. Street, farmer and author, of Salisbury, Wiltshire, England, said at Ottawa recently that "if a war does come the products of Canada will come as the greatest bulwark of national safety for the people of England."

"Produce from Canada can go to England without passing a hostile country while produce from other countries would have to pass unfriendly territory and may never reach England," he said in an address at an agriculture field day.

"The duty of the British farmer is to keep up the fertility of his soil in peace time and I appeal to you to do the same."

"I will ask you to do your best for the farmers of Britain and Canada and not to quarrel as there is room for both of us."

There are about 120,000 comets in the known solar system, according to the estimates of astronomers.

Little Helps For This Week

That we may prove what is that good and acceptable, and perfect will of God. Romans 13:2.

"Thou knowest what is best
And who but Thee, O God, hath
power to know?
In Thy great will my trusting
heart shall rest;
Beneath Thy will my humble
head shall bow.

To those who are His all things are not only easy to be borne, but even to be gladly chosen. Their will is united to that will which moves heaven and earth and gives laws to angels and rules the courses of the world. It is a wonderful gift of God to man, of which we who know so little must speak little. To be at the centre of that motion where is everlasting rest, to be sheltered in the peace of God where all hearts are stayed and all hopes fulfilled is a wonderful experience. Only those who have had it can understand the text "Thou shalt keep him in perfect peace whose mind is stayed on Thee." It is the very secret and mystery of solid peace within to resign all to His will without the least contrary thought.

Canadian Singers In England

Find Choral Efforts On Par With Those Of Old Country

Canadians who went to London to sing in the coronation choir enjoyed their visit and found Canadian choral efforts quite on a par with those of England's.

Invited from different parts of the Dominion the singers received their music before they left Canada but did not meet until they attended the first practice in London.

"We found that we could quite easily keep up with the efforts of the other members of the choir and came to the conclusion that Canada is really suffering from an inferiority complex as far as her choirs are concerned—they are quite as good as anything we have met over there," said William J. Miller of Ottawa Temple choir.

Overheard on the street: "People are funny. I'll bet if a fellow had to belong to a club and pay two dollars in order to push a lawn-mower, there'd be a waiting list a yard long of fellows just dying to have a try at it."

Jenny Lind realized net receipts of \$176,675.09 from her American concert tour under the management of P. T. Barnum.

A Message from the Olds Fair President:

YES SIR, the Olds Fair this year is going to be a humdinger, and folks, when you come in you will not only see livestock, fancy work, baking, etc., but you are going to see some very interesting exhibits by the merchants of Olds, the Olds School of Agriculture and others.

Going on to the Sports on Friday afternoon, the preliminary games of baseball will be played, while the Saturday will give you kiddies' races, and don't forget that in their classes in 5 and under and 7 and under, every boy or girl who enters these races, whether they win or not, will receive a prize. There are athletic events for the older ones and adults, and Horse Races, while the final game of baseball will be played at 6:30. Each night there will be Dancing with Si Hopkins' Oldtime Orchestra in attendance.

No fair would be complete without some rides and shows, and we were very fortunate in obtaining the E.J.C. Shows who have with them the largest portable Ferris Wheel in Western Canada, and in addition they have a Merry-Go-Round and other rides and a line of clean shows and concessions. Everywhere they go they receive very high recommendation, so you need not be afraid of them, but they will give you some good wholesome fun.

And one big feature this year is that the charge to the grounds is only 25 cents for adults, 15 cents for children 10 to 16, and under 10 free.

So don't miss the OLDS FAIR, FRIDAY & SATURDAY, JULY 16th and 17th, for we know you will have a good time if you come. And if you have anything to exhibit, get your Prize List right away from the Secretary and get your entries in by Wednesday, July 14th. There are no entry fees.

Yours truly,
JOHN GRAHAM, President.

LOCAL & GENERAL

Ralph Hansen and John Miller spent the weekend at Sylvan Lake.

Mr. Harold Clemens of Edmonton spent Sunday at the home of his parents here.

Mr. and Mrs. G. A. Wallace and family spent last week at Wildwood, Alberta.

Pete Miquelon left on Monday for Bowden, where he will relieve for a month at the C.P.R. depot.

Alderman A. J. E. Liesemer of Calgary is visiting at the home of his parents, Mr. and J. E. Liesemer.

Miss Ann Jackson of the Didsbury School Staff is attending Summer School at Calgary.

Mr. Lennie Berscht is relieving at the Innisfail store for two weeks while brother Russell is on vacation.

Mr. Bill Ross commenced his vacation on Monday. Hughie Williams is assisting at Builders' Hardware.

John and Miss Elsie Goertz, of Calgary, were Didsbury visitors this past weekend.

Miss Bernice McGhee of Calgary spent a few days last week at the home of her parents here.

Messrs. A. H. Dedels and Oliver Stauffer returned last weekend from a visit to their old homes at Kitchener, Ontario.

Mr. and Mrs. Alex Robertson, Miss Lucille Smith and Mr. Milt Ford left last Friday to holiday at Jasper Park.

See T. E. Scott if in need of Luggage for your vacation!

Mrs. Thaler and the Misses Edna Thaler, Ina Brado and Sevilla Rupp returned last week from Sylvan Lake, where they spent a week's holiday.

Mrs. Roger Barrett has as her guests this week, her parents, Mr. and Mrs. J. F. Parrish, and her brother, Julian, of Salt Lake City. They arrived by car on Friday.

Mrs. Wm. Sutherland and daughter Shirley of Ponoka are visiting Mrs. George Smith during the summer months while Mr. Sutherland attends summer school at Calgary.

Mr. Ed Kercher and sons, George and John are having a week's holiday at the home of Mr. Kercher's daughter, Mrs. Frank Good of Calgary.

Mr. and Mrs. C. R. Ford and daughter Yvonne left Monday for Calgary where they will reside for the next five weeks while Mr. Ford attends summer school.

Last Dance of the Season at Bill Brown's Place, Friday, July 16th. In aid of Rugby Hall. Gents 50c. Draw for beespread will be made same evening.

Mr. and Mrs. W. G. Bruce of Charlottetown, P.E.I., arrived on July 1st to visit at the home of Mr. and Mrs. W. MacFarquhar. Mrs. Bruce is Mr. MacFarquhar's sister.

Ladies—If you want to know how to keep your husbands against any competition, see "Wife Vs. Secretary" at the Opera House this weekend. 2nd Feature—Louis Braddock Fight.

The congregation of Knox United Church capitulated to the heat wave last Sunday. The service was held in the basement to the obvious comfort of all. So delightfully cool was the atmosphere that the practice will be continued in the future when the weather is unusually hot.

The picnic held at the Little Red on Dominion Day by Westcott S.C. Group was a huge success and exceedingly well attended. The ball games, races, etc. were a great attraction and carried out in a most efficient manner. E. P. Foster, M.L.A., gave a speech dealing with the S.C. government's road project, touching on just what the tourist trade meant to Alberta.

For best values in Summer Underwear see T. E. Scott. Men's Combinations 75c up.

Coming Events.

The annual U.F.A. and U.F.W.A. Constituency Association Convention will be held on Friday, July 16, at 11 a.m. under the trees on the lawn of Mr. and Mrs. Claypool at Swallow. All members and friends cordially invited. Ladies please bring lunch.

Mothers and their children are especially invited to the L.W.R. and L.T.L. picnic at the home of Mrs. Ed Boettger today (Thursday) at 3 p.m. Everyone bring a picnic lunch and dishes. The prizes for the recent poster contest will be awarded. All contestants please be present.

Mountain View M.D. No. 310.

NOTICE ON WEEDS

Attention is drawn to Sec. 18 of the Noxious Weeds Act, 1932: "It shall be the duty of every person who is the owner of any parcel of land and of every person who has any beneficial interest in any parcel of land and of every lessee, tenant or occupant of any parcel of land to prevent any noxious weeds from growing upon such parcel of land, and to comply with all the provisions of this Act for the destruction thereof."

"Land" means and includes not only all lands owned and occupied or controlled by any person but for the purpose of this Act, also includes all the land up to the centre line of all contiguous roads or roads allowances.

Your compliance with this Act regarding weeds on road allowances is especially requested.

A. Brusso, Secretary

Work Clothes and Footwear, all lines.—T. E. Scott

Westcott Notes.

The next meeting of the Westcott S.C. Group will be held at the Roland Webster home July 14th.

Westcott W. I. met at the home of Mrs. Frank Dexter, Garfield, on June 24th. A paper on "Canadian Industries" was given by Mrs. R. A. McFarlane and a splendid report of the provincial W. I. convention by Mrs. Harry Steckley. It was decided to send two members to the Farm Women's week at the O.S.A. in July. The members chosen to go were Mrs. M. Jacobsen and Mrs. Dorothy Befus. Mrs. John Spillman of Garfield was appointed delegate to the constituency convention at Carstairs East Community Hall on July 7th. Miss Walsh of Montreal and Miss Dolly M. C. Klevey of Calgary assisted the hostess at teatime. Miss Edith Webster sang during the afternoon. The next meeting will be held at the home of Mrs. Ethel Robertson, when it is hoped to have a rug demonstration by Mrs. Otto Krebs.
